Send for Samples of Material.

DIRECTIONS FOR MEASURING.

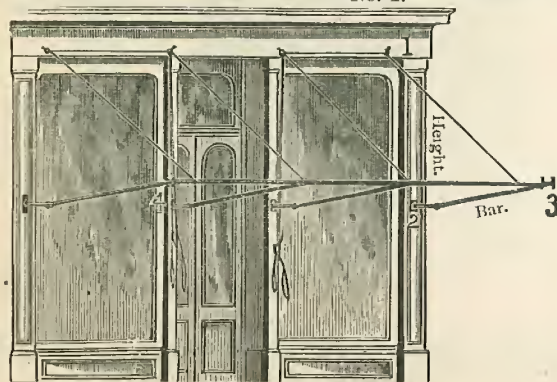

First, determine the place where the joints of the frame will be fastened to the building, which should be from 7 to 8 feet from the sidewalk, according to the height of the front (see figure 2 in diagram) you will observe that the curtain—15 inches deep—drops below that point, for which you will have to allow in clearing people's heads. Then measure from there to, where the top of Awning can be fastened above the windows, (see figure 1 in diagram,) which will be the distance from 1 to 2, or height of Awning: 2 to 3, in a high building should be the same as 1 to 2, but in a low one, a little more. Then measure the width of store from centre of column on one side, to the same on the other side, which will be the distance from 3 to 4, or width of awning. If the top of the window, where the Awning is to be attached, projects beyond the face of the building or is back out of level, mention how much. When ordering a frame, state whether it is to be fixed in stone, brick, iron or wood, and whether the door posts and face of building or outer columns are in line, also whether the frame requires four or more joints and bars.

DIRECTIONS FOR PUTTING UP AWNINGS.

First ascertain the height of the awning, that is, from 1 to 2; measure that distance down the house from figure 1, in diagram, which is the place for the joints, (see figure 2;) if the columns are iron, they will have to be bored and tapped, and the ends of the joints threaded to screw in; if stone or brick, make holes 3 inches deep, and wedge them firmly with hard wood, etc., or lead; if wood, fasten on with screws. Be careful to have the joints in line, and if any of the columns stand back, put the long joints on them; now fasten the bars to the joints with the joint screws, and pass the front rod through the middle ones, and screw one nut on each end of front rod, put on both end bars, and screw on the other nuts. Put up the pulleys as shown in diagram, the middle ones directly over the middle bars, the outside ones about nine inches inwards from the line of the outer columns, and all of them below where the top of Awning will be fastened. Pass the ropes through the pulleys as shown in diagram; one through each center pulley, and attach to front rod by taking a hitch round the bars and rod at the same time, the outside ropes first though the centre, then through the outside pulley and fasten to the front rod, six inches from the end. Now take the Awning, and while the frame is in the same position as shown in the diagram, take off the outside nuts, put the ends of the front rod through the large holes in the corners of the Awning; and replace the nuts outside the Awning; tie to front rod with the tarred string, then raise it up and fix the top to the front at the proper height from the joints; let it down again, and tie on the ends to the bars and it is finished.

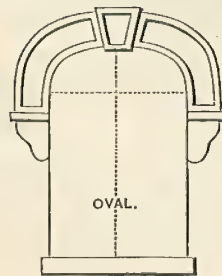

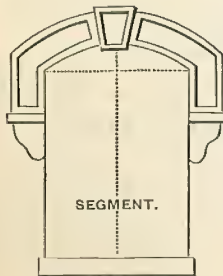

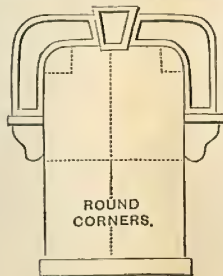

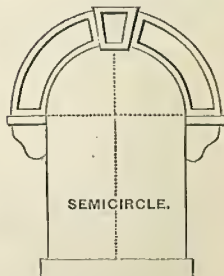

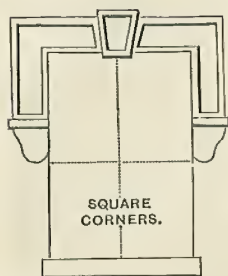

No. 1.

No. 2.

WINDOW AND DOOR AWNINGS,

For Offices, Residences, &c.

DIRECTIONS FOR MEASURING.

In ordering these Awnings, the measure to be taken on the door or window *frames*, not on the brick work, and in all cases state the shape of top of window, giving name of shape from our diagrams.

In measuring for Semi-circles, Ovals and Segments, send height from center of window to sill, width of window and height of curve—see dotted line on cut. For round corners, height, width and square of corner measured, as shown by dotted line on cut. For square tops, height and width of window only.

Price of ordinary Residence Windows from \$5.00 to \$6.00, and Doors from \$7.00 to \$8.00. each.

Awnings without frames, \$1.00 less, for either Doors or Windows.

 **Send for Samples of Material.**

S I G N S .

Having added a sign shop to our business, we are prepared to furnish all kinds of signs on wood, zinc, &c. and can warrant strictly first-class work in every particular, as we employ none but first-class artists; and having our own carpenter shop and drying room, can supply a well made and perfectly dry board.

Our prices are not intended to compete with common work, but, as we have found in traveling through the whole of the west, that many towns have no good sign writer, we have entered into this enterprise for the purpose of supplying our customers with superior work at reasonable rates; and, as nothing adds so much to the appearance of a store as a good sign, and nothing detracts from its appearance so much as a poorly lettered one, we trust that our customers will see the desirability of patronizing us.

These Covers are not Oiled, and will only turn water when used over bows as shown in cut. Are made with drawn cords at each end and cords for tying down sides.

NOTICE.

In this Notice we wish to inform the public that we have bought the exclusive right of manufacturing and selling through the States of Illinois, Indiana, Iowa, Michigan, Minnesota and Wisconsin,

THOMPSON'S PATENT NOVELTY WAGON TOP.

There has of late been a constantly growing demand for a portable top, that could be gotten up cheap, and still durable and easily adjusted. We think that the NOVELTY TOP more than meets all the requirements.

The following is a List of its Advantages over all Tops in present use:

IT IS CHEAP—Being less than half the ordinary price.

IT IS LIGHT—Weighing complete about 35 lbs., and not being top heavy, is no strain on a wagon.

IT IS DURABLE { From its peculiar construction, and not being top heavy, it will wear with the most expensive top
at present in use.

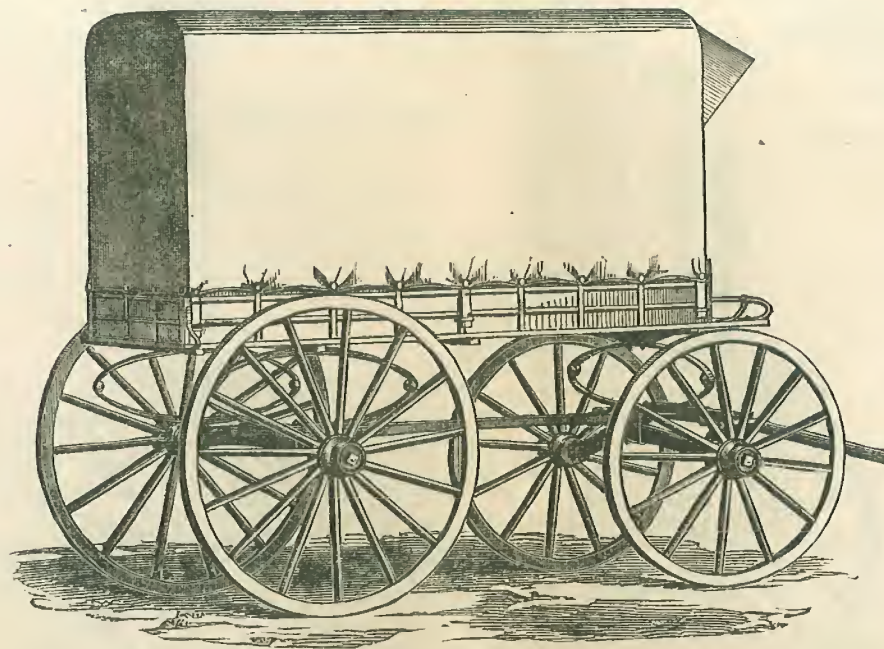

IT IS EASILY HANDLED. { Being so light, and no part having to be separated in putting on or taking off, a boy can
handle it with ease.

**TAKES UP VERY LITTLE ROOM
WHEN OFF THE WAGON.** { It can be folded up without separating any of the parts, so as to be only 10 to 12
inches in thickness, and in that shape (see cut No. 6) can be hung against the wall
or stood behind the door.

SHIPPING.—It is so light and takes up so little room that the cost of freight is merely nominal.

NOVELTY WAGON TOP.

THE CHEPEST THING YET!

DIRECTIONS FOR MEASURING.
Send Length, Width and Height of box and Height of Seat.

Prices for larger Wagons, and Trucks charged at proportionate rates.

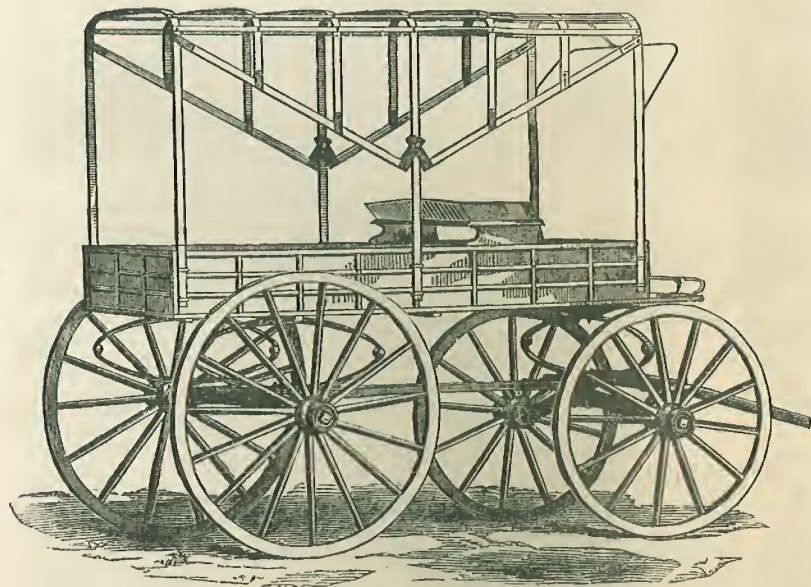

NOVELTY WAGON TOP.

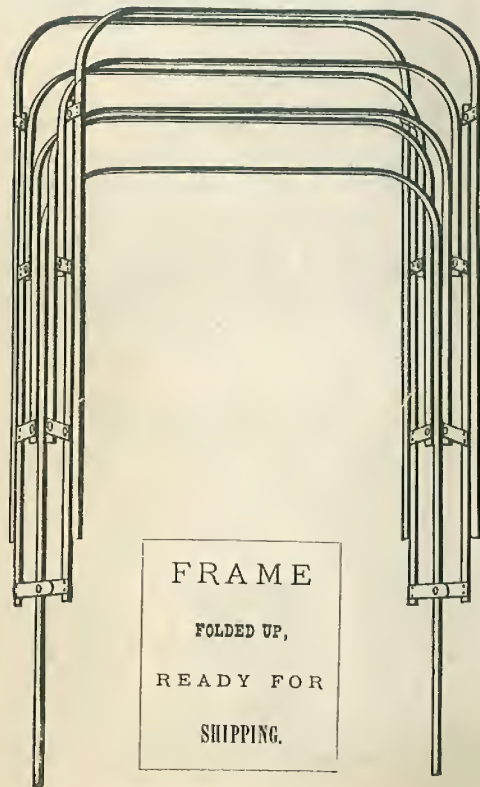

This cut shows the cover with the back end thrown up, so as to be out of the way when loading or unloading, and of course the front part can be folded up at the same time if necessary. By this improvement a much lower cover can be used on a wagon than is possible with a top made in any other way.

NOVELTY WAGON TOP.

Cut No. 5 shows the frame complete, fastened to the wagon box. The bows are attached to the sides by staples and thumb screws, and the staples can be put either inside or outside of the box.

A" or WEDGE TENT.

ROUND TENT.—Center Poles made in two Pieces, 50c. extra.

Having the Centre Pole of these Tents made in two pieces makes them very portable, as the poles and stakes can be rolled up in the Tent, and the package not be more than four or five feet long, or half the length of the pole. All our Round Tents are made with ventilators in the top as shown in the cut.

If the Top of Tent were made of 12 ounce Duck, and the Wall of 8 ounce duck, the cost would be the same as 10 ounce List. This is advisable.

For further Explanation about Bed Rooms, etc., see page 22.

EXPLANATION OF AWNING AND BED ROOM IN FAMILY TENT.

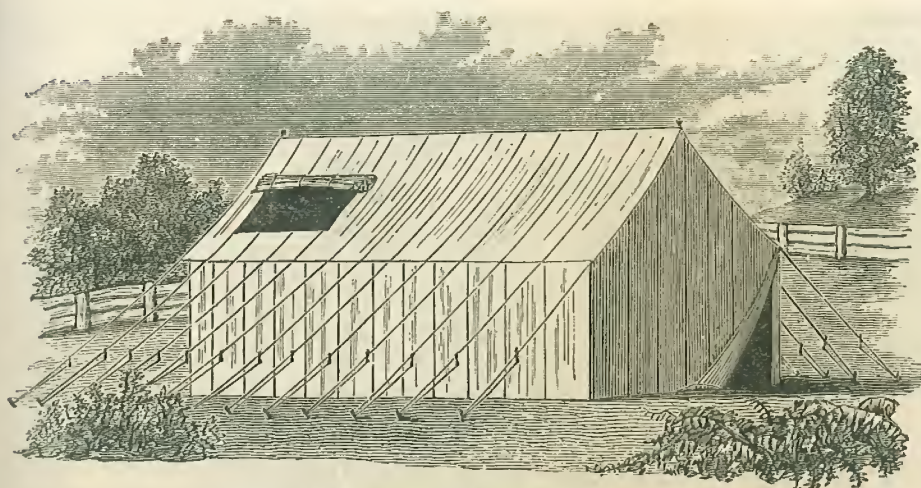

The Awning principal, in Family Tent, shown on previous page is a great improvement for many reasons. It is not extra to the tent, but is simply part of the wall lifted up to form an awning instead of being drawn to one side; this gives free circulation of air through the tent, besides affording a beautiful shade. The walls of the bed rooms are made of sheeting, and are the same height as the walls of the tent; they are attached by rings to cords, stretched from the centre poles to the side.

OBLONG.—Round End.

ROUND TENT.

 We make no price list on OBLONG—ROUND END, and ROUND TENTS, as shown above, but make them to order, any size required. Please send for price on size desired.

PHOTOGRAPHERS' TENT.

CAMP FURNITURE.

PATENT FOLDING DOUBLE BED.

IMPROVED SINGLE BED.

SINGLE BED, or COT.

This is the strongest and most comfortable

DOUBLE BED \$4.00.

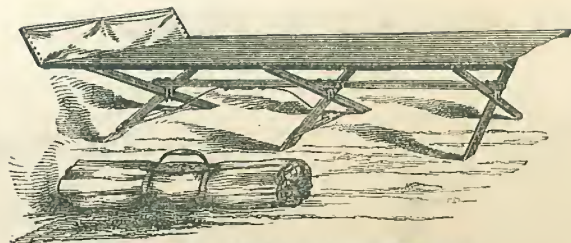

ever made. It NEEDS NO MATTRESS, and occupies very little space when folded up. Dimensions when folded: 6 ft. 3 in. long and 10 in. by 3 in. thick, weight 30 lbs. It is a very desirable addition to the furniture of any house.

This is an improvement on the regular Cot shown below, being much lighter, and neater in appearance, and at the same time more steady; weighs only 15 lbs.

Price, - - - \$2.00.

Price, - - - \$2.00.

Weight. 21 lbs.

STEVENS' PATENT FOLDING BED.

This is the most portable bed made, being when folded up, only 2 ft. 8 in. by 6 in. It is very strong and is perfectly steady when set up. It is made to fold into so small a space so that it can be carried in a trunk.

The most desirable bed in the market for portability and strength.

Weight 13 lbs., Price, 3.00

We have the exclusive right of manufacturing this Bed for the U. S.

The legs and supports of these

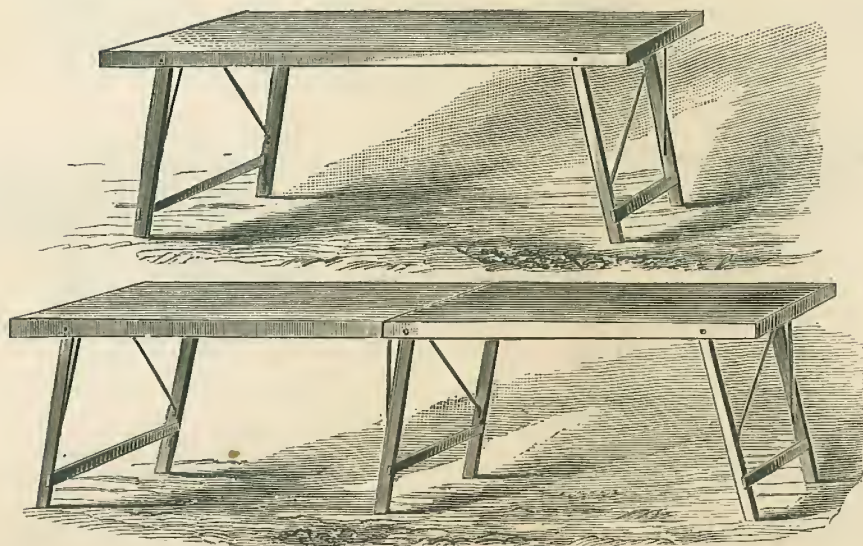

TABLES

fold in so as to lay flat against the Table, and the double one is hinged in the center and folds together, enclosing the legs inside.

They are strong, light and portable.

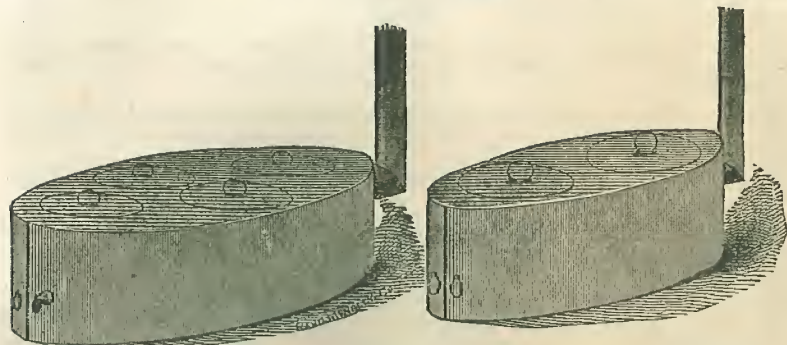

PRICE.

Single, 6 ft. 6 in. x 2 ft. 4 in.....	\$2.50
Double, 10 ft. x 2 ft. 4 in.....	4.00

FOLDING TABLES.

CAMP STOVES.

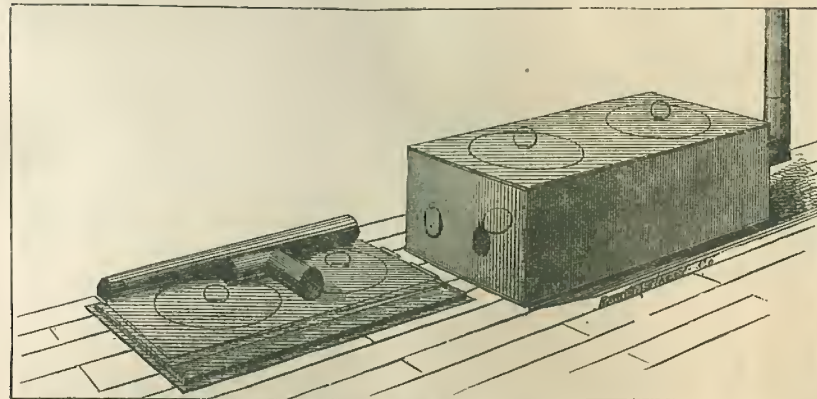

Weight, 13 lbs.—Price, \$3.75.

Weight, 9 lbs.—Price, \$2.50.

These prices include two lengths of telescope fitting pipe and one elbow.

The Stoves have no bottoms, the ground forms the bottom, and in packing, the Stove turned upside down will hold the stove pipe and cooking utensils.

FOLDING STOVE.—PRICE, \$5.00.

This Stove folds up, as shown in cut, making with the stove Pipe a very small package. Weight, 12 lbs.

We furnish an Oven which can be used on either of our style of Stoves.

Price, - - - - - \$3.50.

BLACK OILED CANVAS WATERPROOF COVERS.

The following lists of Covers are Warranted Waterproof, and include all the sizes that we manufacture to keep constantly in stock, but we can supply any size or shape of cover desired in about two weeks after receipt of order. These covers, although black and called tarpaulins, have no tar or rubber in their composition.

Our waterproof dressing is an oil preparation, free from anything calculated to rot or burn the canvas, also being impervious to water and very soft and pliable, it adds to the durability of the covers. Our covers will neither stick together from heat, rot or mildew from damp nor break from becoming to hard.

They are, invaluable to all persons owning horses that have to be exposed to wet weather, during the fall, winter or spring months, or who are shipping and receiving goods that are liable to damage from wet.

LAP COVERS.

6 feet x 4 feet 9 inches.....	each, \$2.50
5 " 3 inches x 4 feet 9 inches.....	" 2.00
4 " 9 " x 3 " 9 ".....	" 1.50
COATS,	" 4.00
LEGGINS	" 1.00

We keep a Stock of 8 oz. dressed Duck of the following widths, constantly on hand:

28 inch,.....	50 cents per yard.	37 inch,.....	60 cents per yard.	45 inch,.....	75 cents per yard.
51 inch,.....	87 cents per yard.	56 inch,.....	\$1.00 per yard.	71 inch,.....	\$1.25 per yard.

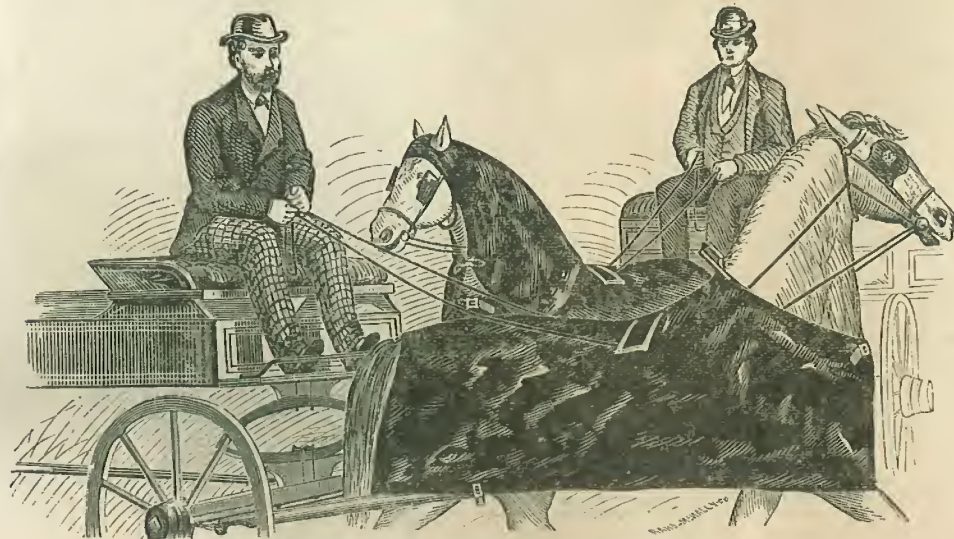

THE FOLLOWING ARE A FEW OF THE ADVANTAGES WE CLAIM FOR OUR COVERS OVER RUBBER:

They are perfectly waterproof, cost less, are more durable, made of better material, can be as easily repaired as clean canvas, the composition cannot peel off, as the cover is saturated with it, and after being in use for some time, if found to leak, can be made perfectly waterproof again at trifling cost.

HORSE COVERS.

WARRANTED WATERPROOF.

We keep a large assortment of these Covers, ranging in size from 4 feet 6 inches to 5 feet 6 inches in length, i. e., from collar to tail; so that we are enabled to fit any size of horse.

COMMON COVER AND HOOD.

THE HOOD AND BODY PARTS
